ice

The natural irregularity yet powerful glistening formations of ice bring a cool and sophisticated twist and update to the current trend for shine and fluidity. Intensely deep cool blues merge with subtly iridescent greenish teals that lie beneath the frozen surface of ice. Creating a glossy, polished feel that maintains a contemporary undercurrent of frosted matteness, offering clear contrasts of material mixtures with matte and shine.

AW/20/21

IN SEARCH OF EXCELLENCE

For AW 20/21 we have developed our collection with sustainability very much at the forefront of our concepts whilst still maintaining a strong fashion directional collection. We have taken inspiration from the origin and source of materials, where they come from and the natural beauty of colour, surface and pattern they create.

Since the need to be more sustainable has become an essential element of all fashion collections and no-longer just a niche market with specific products, we have created all our yarns to now be available with an eco-friendly alternative.

Please see our eco symbol that indicates a sustainable alternative to all our special effect yarns.

Our trends and yarns are merely a starting point to inspire you for the season, however we are more than happy to develop to any customers unique ideas and requirements.

Please contact us for more details or to find out what winsome yarns ltd can do for you at exports@winsomergroup.com
